### Installation Instruction for HP BETA 4

Use this instruction to include the slideshow manually. We recommend this if you have made custom alteration to the hotproperty.html.php file. If you did not change the original HP files in any way you can use the second set of instructions.

#### Install manually

1. Install the module using the Joomla module installer
2. Do NOT publish the module. We just this just for easy installation
3. Make a backup copy of the  
/components/com\_hotproperty/views/property/tmpl/default.php
4. Open the /components/com\_hotproperty/views/property/tmpl/default.php file
5. Find the following line (approx 46)  
`<?php if (isset($this->images[0]->standard) && $this->images[0]->standard  
<> '') {`
6. Find the following line (approx 93)  
`<?php } // End If: count($this->images) ?>`
7. Delete everything between those 2 lines and the 2 lines as well
8. Insert the following lines in the deleted space  
`<?php  
/* ##### RT Property Slideshow copyright 2007  
www.costablancawebservices.com ##### */  
include_once( JPATH_SITE.'/modules/mod_hp_rtproplslider/mod_hp_rtproplslider  
.php');  
?>`

#### Easy Installation

(only if you have not changed the original views/property/tmpl/default.php file)

1. Install the module using the Joomla module installer
2. Do NOT publish the module. We Did this just for easy installation
3. In your original installation of Hot property (on your server) locate file  
'views/tmpl/default.php' and rename it to  
'views/property/tmpl/default.php.bak' ( this is to make a backup)
4. copy the file default.php from the module folder into the  
components/com\_hotproperty/views/property/tmpl/ folder

#### After the installtion

Log into the control panel from Joomla and open the module manager. Here you can select and change all the option from the slidshow.

**Do not PUBLISH the module. It is just needed for easy configuration and installation.**

**That's all. Open a property page and check the slider.**

### Installation Instruction for HP BETA 5

Use this instruction to include the slideshow manually. We recommend this if you have made custom alteration to the hotproperty.html.php file. If you did not change the original HP files in any way you can use the second set of instructions.

#### Install manually

1. Install the module using the Joomla module installer
2. Do NOT publish the module. We just this just for easy installation
3. Make a backup copy of the /plugins/hotproperty/gallery.php
4. Open the /plugins/hotproperty/gallery.php file
5. Find the following line (approx 51)  
ob\_start();
6. Find the following line (approx 90)  
ob\_end\_clean();
7. Delete everything between those 2 lines and the 2 lines as well
8. Insert the following lines in the deleted space

```
ob_start();
?>
<?php if (@$property->Photo) : ?>
    <div class="gallery">
<?php
/* ##### RT Property Slideshow copyright 2007
www.costablancawebservices.com ##### */
include_once( JPATH_SITE.'/modules/mod_hp_rtpropslider/mod_hp_rtpropslider
.php');
?>    </div>
<?php endif; ?>
<?php
$html = ob_get_contents();
ob_end_clean();
```

#### After the installation

Log into the control panel from Joomla and open the module manager. Here you can select and change all the option from the slidshow.

**Do not PUBLISH the module. It is just needed for easy configuration and installation.**

**That's all. Open a property page and check the slider.**
